

SKILLS

Python / FastAPI	Advanced
React.js / Next.js	Advanced
Node.js / Express	Advanced
AWS / GCP	Intermediate
PostgreSQL / MongoDB	Intermediate
AI/ML / Gemini API	Intermediate
RAG Pipelines	Familiar
Docker / CI/CD	Intermediate
Git / GitHub	Advanced

BUDUMURU SRINIVAS
SAI SARAN TEJA

AI Full-Stack Engineer

PROFILE

Highly motivated AI Full-Stack Developer with a strong portfolio demonstrating end-to-end ownership in building **AI-driven web applications**. Proficient in **React.js/Next.js** for dynamic frontends and **Python/FastAPI** or **Node.js/Express** for scalable backend APIs. Experienced in designing **RESTful APIs**, managing **PostgreSQL/MongoDB** databases, and integrating **LLMs/Gemini APIs** for intelligent features. Familiar with **RAG pipelines** and deploying on **AWS/GCP**. Certified in Generative AI.

WORK EXPERIENCE

Backend API Engineer

Freelance Project: Resume Tailoring & Portfolio Engine

Nov 2023 - Present

- Developed a production-ready API for ATS-friendly resume generation, optimizing dynamic templates to reduce document generation latency by 40%.
- Engineered polymorphic data ingestion pipelines, processing diverse JSON and PDF inputs.
- Deployed and maintained production infrastructure on **AWS EC2** using **Docker**, ensuring reliable 24/7 system availability.

HireHawk - AI Job Automation Agent

FastAPI, PostgreSQL, TypeScript

URL: [Link](#)

- Architected an **AI-driven** job automation agent using **FastAPI** and **PostgreSQL**, isolating long-running scraping pipelines.
- Integrated Redis Streams for real-time progress logs, streaming live execution data via Server-Sent Events (SSE).
- Engineered a fault-tolerant SSE Manager in **TypeScript** for robust network stream recovery.

CodePlay - Multi-Agent Orchestration System

PostgreSQL, LLM, Docker

URL: [Link](#)

- Engineered a multi-agent backend controller to autonomously plan and generate playable browser games, demonstrating **AI/ML integration**.
- Orchestrated persistent session state management using **PostgreSQL** and Prisma for seamless **LLM interactions**.
- Containerized the application with **Docker**, ensuring zero-dependency, executable code generation.

BuildFlow - Workflow Automation Engine

TypeScript, Kafka

URL: [Link](#)

- Spearheaded the architecture of a low-code workflow automation platform, optimizing for sub-200ms latency per node.
- Orchestrated a distributed task processing system with **TypeScript** and Kafka for asynchronous workflow execution.
- Developed a resilient state management module, reducing workflow failures by 40% through automated error propagation.

EDUCATION

B.Tech in Computer Science and Engineering

MVGR College of Engineering (A)

2022 - 2025

Diploma in Computer Engineering

Government Polytechnic College

2019 - 2022

CERTIFICATIONS

- Oracle Certified Generative AI Professional (2025)
- Oracle Cloud Infrastructure Foundations Associate
